## ABOUT US

As a leading European manufacturer and distributor of household and away from home paper products, our group's history dates back to 1999, when **Vajda-Papír Ltd.** was founded. as a family business. Vajda-Papír Group now boasts three production sites in Hungary and one in Norway with more than 700 employees.

Thanks to our conscious strategy, our company has grown into a market-leading position in the hygiene paper sector in Hungary, and also became a significant and challenging competitor to large international companies. In addition to sales in Hungary and Norway, our products are shipped to more than 30 countries around the world, and more than 50% of the group's total paper production is sold on export markets.

In 2024, **Vajda-Papír's** combined sales revenue at both subsidiaries exceeded EUR 255 million, and in 2025 it is expected to reach EUR 283 million. The group's annual paper production will exceed 150,000 tons in 2024 and 2025.

Green solutions and the circular economy are important elements of the vision for our dynamically growing group. That is why we pay special attention to innovative, efficient, and sustainable operations and environmentally friendly production. From product development through manufacturing and transportation to sales, impact in all our activities we strive to minimize our impact on the environment. These circular waste management-oriented manufacturing technologies and processes ensure sustainable production:

- In our factories, our product are made from cellulose coming from forests certified (**FSC®**) as responsible forest management and other controlled sources
- We recycle 100% of the paper waste generated during processing from roll edges and cut-offs.
- We reduce water consumption through our own water and wastewater treatment and biological purification of water from paper production, while increasing energy efficiency.
- Our product packaging is 100% recyclable and contains 60% recycled material.

Although **Vajda-Papír** is primarily known as a manufacturer of household hygiene paper, in 2018 we launched our away from home business, targeting a new customer segment, the industrial market. We introduced the **Ooops! Professional** brand family, which includes high-quality hygiene paper products developed specifically for HoReCa use.

# SUSTAINABILITY

Using environmentally friendly solutions is one of the main principles of **Vajda-Papír**. Therefore, it is a main purpose for us to create a working environment in the most innovative way. In addition, our company follows and abides by the rules and regulations governing our activities, but we go beyond that by performing activities the environmental impact of which meets the strictest standards. We keep developing and training our staff; to take their professional skills into consideration when making decisions.

At **Vajda-Papír** we believe that production should also be environmentally friendly, so by making useful products at a competitive price, in a way that is both economical and have minimal environmental impact, using the latest advances in technology and logistics. Reusing production waste is also a high priority, e.g. during the production all base paper waste is being reused.

## CERTIFICATES

We are proud of having

The mark of responsible forestry

By sourcing PEFC paper, Vajda Papír Kft is supporting sustainably managed forests globally
